TECHNICAL SHEET

URANIA

ENERGY ankle high shoe

MB3114Z9

UPPER
Action Leather, high wear resistance.

CLOSING
Laces

LINING
DRY PLUS in tight-weave polyester designed to significantly reduce the overheating effect from prolonged use, keeping feet cool and dry. Includes extra protection in the heel area.

TOECAP
Fiberglass, lightweight and non-magnetic, offers high protection against impacts and compressions, ensures good thermal insulation.

PUNCTURE-PROOF
PS type composite, non-magnetic, antistatic, and thermal insulating. It offers maximum performance in terms of puncture resistance, full sole protection, and maximum flexibility.

FOOTBED
Made of variable-thickness polyurethane foam, with a Memory Foam upper layer, laminated with polyester microknit fabric. Preformed in the medial area, it supports the foot's accommodation, adapting to its conformation. Antistatic, it features ventilation holes in the forefoot area and ventilation channels on the bottom to promote air recirculation during use. Removable footbed.

SOLE
PU/PU BASF®, SR-rated dual-density slip-resistant polyurethane, offers the optimal balance between comfort and durability. The soft and flexible midsole ensures excellent shock absorption. The compact outsole and self-cleaning design provide maximum stability and traction even in the presence of viscous liquids such as oils.

FEATURES
ESD Designed for safety and comfort, with an eye on design, Urania BSF can meet a wide range of professional needs. A wide collection in terms of model types offered, all ESD grade, dissipative footwear, compliant with standard CEI EN 61340. Suitable for: light industry, logistics and goods handling, service sector. In the footwear sector, BASF® materials are particularly valued for their lightness, flexibility, and thermal insulation capacity. They also offer excellent resistance to abrasion and impact, ensuring comfort and durability over time.
